Re: Santikos 281/1604

POADP # 327-D

Dear Mr. Moczygemba,

The City Staff Development Review Committee has reviewed Santikos 281/1604 Subdivision Preliminary Overall Area Development Plan # 327-D Please find enclosed a signed copy for your files. Although your plan was accepted, please note the following:

- Based on the topography, a Flood Plain Study and drainage review will probably be required during the platting process. Bexar County Public Works may require base flood elevations at the plat level.
- In consideration of public safety and convenience, excessive grades by reason of topography should be avoided in street layouts and arrangements.
- This development will probably need to conform to requirements associated with development over the Edwards Aquifer. For additional information about these requirements you can contact SAWS at 704-7305.
- Access and R.O.W. issues along State facilities will need to be resolved with the Texas Department of Transportation (TXDOT). For information about these requirements you can contact TXDOT at 615-5814.
- This development will need to comply with tree preservation ordinance #85262. For information about these requirements you can contact Building Inspections at 207-7102.
- It will be expected that you will plat all of the property depicted in your POADP, to include: floodpains, drainage areas and open space.
- I would encourage you to work closely with the school district, so that they can plan accordingly.

Mr. Mocygamba
Page 2
January 21, 2000

Please note that this action by the committee does not establish any commitment for the provision of utilities, services or zoning of any type now or in the future by the City of San Antonio. If the proposed development is not platted in phases this POADP will be invalid. Platting will have to comply with the UDC.

If you have any questions regarding this matter, please contact Mr. Michael O. Herrera, at (210) 207-7900.

Sincerely,

Re: Santikos 281/1604

POADP # ?

Dear Mr. Rion

The City Staff Development Review Committee has reviewed Santikos 281/1604 Subdivision Preliminary Overall Area Development Plan. Please note that your plan was not accepted, based on the following:

1.) Sec. 35-2075 Information Required

(a) Perimeter property lines. **Are not clear and distinct.**

(e) Existing and proposed circulation system of collector, arterial, and local type B street and their relationship to any adjacent major thoroughfares; and any proposed alternative pedestrian circulation system. **Were not provided.**

(h) Existing adjacent or perimeter streets (including right-of-way widths), intersections, and developments. **Were not provided.**

The proposed driveway that general note #1 refers to must be supported by an official letter from Tx-Dot or eliminate it from this submittal.

2.) Sec. 35-4110 Access From Major Thoroughfares

(d) Paragh, (2) The resulting additional ingress and egress of vehicles **Will** seriously disrupt the flow of traffic on the thoroughfare. A 1'-non accesses esm't will be required on the properties adjacent to the proposed collector.

3.) Access needs to be provided to the adjoining properties for connectivity.

4.) The digital file was missing from submittal.

If you have any questions or comments regarding this matter, please contact Michael Herrera at (210) 207-7900.

Sincerely,

A handwritten signature in black ink, appearing to read "Emil R. Moncivais". The signature is fluid and cursive, with the first name "Emil" being more prominent.

P.O.A.D.P. REVIEW

Santikos 281/1604

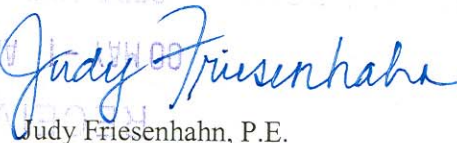

Located on US 281 @ Loop 1604

Elizabeth Carol
City of San Antonio Department of Planning
P.O. Box 839966
San Antonio, Texas 78283-3966

<u>P.O.A.D.P. Reviewed for:</u>	<u>Comments</u>
Noise Mitigation	For residential development directly adjacent to State ROW, the developer shall be responsible for adequate set-back and/or sound abatement.
R.O.W. Requirements	At the time of platting, a variable width right of way dedication/reservation will be required along the US 281 frontage.
Access Limits/Restrictions	Locations of access points to US 281 & Loop 1604 from this property, will be as directed by Regulations For Access Driveways to State Highways. See additional comments below.
WPAP Requirements	A complete copy of the approved WPAP will be required at the time of platting. State right of way will not be utilized for the purposes of treating storm water runoff from adjacent property.

Permit applications along with plans for street, driveway, utility, sidewalk and drainage construction must be submitted to the Texas Department of Transportation for review and approval before working on highway ROW. TxDOT requires that a recorded plat accompany all driveway permit applications. The Owner/Developer is responsible for preventing any adverse impact to the existing drainage system within highway ROW.

ADDITIONAL COMMENTS: The total number of three access points along US 281, and the total number of five access points along Loop 1604 are acceptable, and are considered the maximum to be permitted. The location of the western access point on Loop 1604 is unacceptable. Access points at highway exit ramps shall be a minimum distance of 460' downstream of the of the exit ramp gore point. The access point along the Sonterra Boulevard right of way will not be permitted. In fact, TxDOT will not permit ANY access along the right of way call of S 75°51'39"E (500'). It was discussed at the February 16, 2000 meeting between TxDOT, Santikos, Pape-Dawson Engineers & WHM Transportation that TxDOT may permit an access point along this call in the future, once the fully directional interchange is constructed at Loop 1604 and US 281, and US 281 is expanded accordingly.

CITY OF SAN ANTONIO
Public Works Department

Interdepartment Correspondence Sheet

TO: Elizabeth Carol, Planning Department

FROM: Streets and Traffic Engineering Division

COPIES TO: File

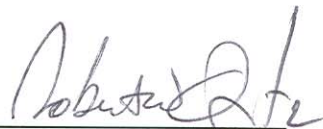

SUBJECT: Santikos 281/1604, POADP Level 3 T.I.A.

Date: May 18, 2000

The Streets and Traffic Engineering Division has reviewed the Level-3 Traffic Impact Analysis for the Santikos 281/1604, POADP. By virtue of simply identifying the traffic impacts, it is in compliance with the Traffic Impact Analysis Ordinance 84917.

Located on the northeast corner of US 281 and Loop 1604, this property will consist of movie theatre, several shopping centers, and restaurants. According to the Level 3 T.I.A. submitted in 1998, this development will generate up to 1,792 peak hour trips based on the 6th edition of the ITE Trip Generation Manual. Sontera Blvd, classified as a secondary arterial, will be extended through the middle of this development with 13 access points proposed on both sides of the roadway extension. Three access points are proposed onto US 281 and six access points are proposed onto Loop 1604.

Although these plans are conceptual, minimum access should be maintained in order to uphold safe and efficient traffic flow. Therefore, the developer of this property is encouraged to design common access and shared driveways between all proposed lots. In addition, raised medians with minimal openings must be provided with the design of Sontera Road in order to provide more controlled access.

Robert W. Opitz, P.E.
Chief Engineer
Development Review and Drainage

Re: Santikos 281/1604 POADP
Transmittal for Re-Approval

Dear Ms. Carol:

Transmitted for re-approval is the Santikos 281/1604 POADP for the ± 100 acre tract located at the northeast corner of U. S. 281 and Loop 1604 within Council District 9. The POADP was previously approved under the Santikos 281/1604 POADP, POADP No. 327-C. The previous POADP expired on January 16, 2000.

We are also transmitting a copy of the previously approved Traffic Impact Analysis (TIA) and TIA Threshold Worksheet. The proposed use of the property, alignment of the proposed extension of Sonterra Blvd. and the proposed gross floor area of the overall development have not changed significantly since the approval of the previous TIA and POADP.

We ask that your staff review and approve the updated POADP at the earliest possible date. I ask that I be allowed to attend any and all review meetings associated with the review and approval of the POADP. Two copies of the POADP have been submitted to Ms. Judy Friesenhahn at TxDOT and to Mr. Kirk Nixon at SAWS Aquifer Studies.

Thank you for your assistance with our request. Please call if you have any questions or if you need additional information.

Sincerely,
Pape-Dawson Engineers, Inc.

Brice Moczygamba, P.E.
Vice President

Re: Santikos 281/1604 POADP
Response to May 17, 2000 Review Comments

Dear Mr. Moncivais:

This letter is our written response to your Department's written review comments to our April 12, 2000 re-approval request of the Santikos 281/1604 POADP, POADP No. 327-C. We take great exception to your letter and the delay it has caused our Client. We have addressed each item of your May 17, 2000 letter as follows:

1. Sec. 35-2075 Information Required

(a) Perimeter property lines. **Are not clear and distinct.**

The perimeter property lines were clear and distinct on the POADP which was submitted for review and approval. All perimeter property lines were labeled with bearings and distances. We have added the label "Perimeter Property Line" to the drawing.

(e) Existing and proposed circulation system of collector, arterial, and local type B street and their relationship to any adjacent major thoroughfares; and any proposed alternative pedestrian circulation system. **Were not provided.**

The existing and proposed circulation system of collector, arterial and local type B streets and their relationships to any adjacent major thoroughfares were clearly documented on the POADP. The existing Sonterra Blvd. crossing of US 281 was documented along with the current lanes of US 281 and Loop 1604. The proposed layout of Sonterra Blvd. east of US 281 and the proposed Gold Canyon extension north of Loop 1604 were clearly shown and labeled. Currently there are no plans for the construction of other public arterials or local type B sheets within the limits of the property.

PAPE-DAWSON ENGINEERS, INC.

555 East Ramsey | San Antonio, Texas 78216 | Phone: 210.375.9000 | Fax: 210.375.9010 | info@pape-dawson.com

(h) Existing adjacent or perimeter streets (including right-of-way widths), intersections, and developments. **Were not provided.**
The proposed driveway that general note #1 refers to must be supported by an official letter from TxDOT or eliminate it from this submittal.

Existing adjacent or perimeter sheets, intersections and developments were clearly provided and labeled on the POADP. The proposed adjacent land uses were clearly labeled to the best of our knowledge.

The proposed driveway that general note #1 refers to was supported by an official letter from TxDOT dated April 18, 2000 addressed to Ms. Elizabeth Carol and was addressed as follows under their additional comments:

"It was discussed at the February 16, 2000 meeting between TxDOT, Santikos, Pape-Dawson Engineers, Inc. & WHM Transportation that TxDOT may permit an access point along this call in the future, once the fully directional interchange is constructed at Loop 1604 and US 281, and US 281 is expanded accordingly."

2. Sec. 35-4110 Access From Major Thoroughfares

(d) Paragh, (2) The resulting additional ingress and egress of vehicles **Will** seriously disrupt the flow of traffic on the thoroughfare. A1'-non accesses esm't will be required on the properties adjacent to the proposed collector.

The POADP process can not restrict public access under the Unified Development Code. Section 35-4110 "Access from Major Thoroughfares" will be addressed during the platting process. Section 35-4110 (b) addresses the number of access points allowed for lots in commercial, industrial and medium or high density residential developments. The owner shall not agree to a one-foot no-access easement under the POADP process.

3. Access needs to be provided to the adjoining properties for connectivity.

Access will be provided to adjoining properties as a result of the proposed construction of Sonterra Blvd.

4. The digital file was missing from submittal.

Section 35-2075 "Information Required" for a POADP under the City of San Antonio's Unified Development Code does not allow the City of San Antonio to request a digital file for the submittal of a POADP.
